

Description: The “Wacky Whirly” straw cutter will change the way you look at straws! Now a straw can be great fun!!! Make dangly mobiles, wacky creatures, even bracelets or necklaces and more! It’s quick, it’s easy and it’s fun to use.

Ages 8 and up

For Straws: This cutting machine is approximately 2 ¾” x 1”. The thumb screw is preset at the factory for normal cut, but is adjustable for thinner or thicker cuts.

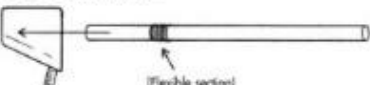

PERFECT when making toys for small animals, they will tug and play for hours trying to remove them!

Basic Operation

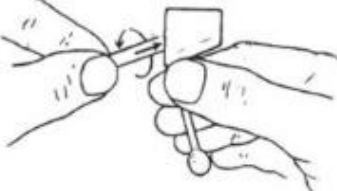

Thumb Screw is preset at factory for normal cut.

A-1 Turn the thumb screw “in” to make a thinner cut. Back the screw “out” to make a thicker cut
NOTE: Just a small turn makes a BIG difference

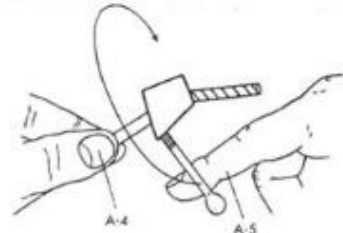

(flexible section)

A-2 Place straw all the way into tool until end of straw is up against cutter. (flexible end should always go into tool first when using flexible straws).

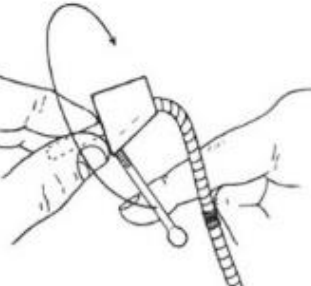

A-3 Rotate straws 1/2 turn to begin the cut... if tool will not cut, back thumb screw out (turn counter clock-wise) until it will cut.

A-4 Hold straw here.

A-5 Spin tool around straw with finger allowing straw to “feed” into the tool as it cuts.

A-6 When close to end hold onto the straw firmly so the straw can no longer “feed” into tool.

A-7 Continue to spin the tool until the straw is cut off.
